Personal Statement:

Dynamic and performance driven engineering professional having 8 years of rich experience in Supply chain management, Manufacturing engineering, Electrical engineering, design and drafting, PLC automation in Automobile Industry.

Skills and Competencies:

- Hands on experience in DANA ANAND PDM tools – **SAP (MM)**
- Hands on experience in DANA ANAND for PPC – **Heijunka System**
- Hands on experience in Toyota Kirloskar Auto Parts Check Sheet Preparation and evaluation for project implementation - **(Safety, control and equipment check sheet)**
- Hands on experience in Toyota Kirloskar Auto Parts PDM tools – **Amrut system**
- Hands on experience in Toyota Kirloskar Auto Parts – Inhouse Execution of engineering change point request w.r.t **Cost reduction ideas, zero accidents and incidents, zero defect, cycle time reduction, process improvement**, which includes engineering drawing preparation and updation, BOM preparation, specifications and other related documentation associated with change points.
- Sound knowledge in Order Management process, Engineering Change Management, and **project planning process**.
- Hands on experience in **Schedule preparation**, tracking and management for project execution in time with zero delay.
- In-depth knowledge in PLC programming tools – **Siemens (S7200, S7300), Mitsubishi (Q series, FX series), Toyopuc (PC-2J, 3J & 10J), Fanuc and Fuji**.
- Hands on experience on **Fanuc system upgradation and Retrofit activity for various machines**.
- Hands on experience in HMI designing and troubleshooting – **Mitsubishi (GT designer), Siemens, Unitronics**.
- Basic knowledge of **Scada system, AI and IOT implementation**.
- In depth understanding of **Electrical equipment's and component's specifications, safety switches and gears, Ladder drawing and panel design**.
- Hands on experience in **Electrical panel building and troubleshooting**.
- Hands on experience in CAD tools – **Auto CAD and Solid works**.
- Good understanding of ISO standards – **ISO 14001:2015 & ISO 45001:2018**
- Knowledge in car spare parts nomenclature, its function and usage.
- Basic understanding of Mechanical drawing.
- Hands on experience in **7 step problem solving method and 6 sigma tools for process improvement and its sustainability**.
- In-depth knowledge of **PFMEA, FTA – Function analysis, structure analysis, failure mode analysis, and preparation and evaluation of Risk assessment**.
- Possess sound interest in Production Engineering (Planning & Development), Machine Building & Modification, Maintenance & Troubleshooting and CNC & PLC Program development.
- Skilled in creating designs & plans with **Kaizen ideas**, layout, scheduling and managing resources to ensure execution of projects within time and budgeted parameters.
- An **effective communicator** with excellent interpersonal, **problem solving & analytical skills** and good **negotiation skills**.

Professional Profile:

- **Dana Anand Pvt Ltd Dharwad** – Assistant Manager in Supply Chain Management (Jan 2023 – Till date)
- **Toyota Kirloskar Auto Parts Pvt Ltd Bangalore** – Team Leader in Purchase and Planning (Jan 2017 – April 2020)
- **Toyota Kirloskar Auto Parts Pvt Ltd Bangalore** – Assistant Engineer in Manufacturing Engineering (Aug 2012 – Dec 2016)
- **Toyota Kirloskar Auto Parts Pvt Ltd Bangalore** – Intern (April 2012 – July 2012)

Experience:

➤ Dana Anand Pvt Ltd

Period : Jan 2023 – Till Date

RESPONSIBILITIES AND CORE COMPETENCIES

- Inventory Management by conducting physical inventory check to decide order size and place orders with vendors on monthly basis.
- Tracking parts data in numerous spreadsheets, managing supplier timelines and commit dates.
- Schedule preparation for material ordering based on production plan (Heijunka Sequence), previous consumption data and safety stock condition.
- Ensuring 100% procurement of material and support PPC to achieve and improve the sales rate.
- Co-ordinating with warehouse supervisors to verify receipt and storage of inventory, proper tracking of stock in inventory database, and achieve required goal during Internal and External Audit.
- Co-ordinating with logistic team to arrange transport for material delivery on timely manner.

➤ Toyota Kirloskar Auto Parts

RESPONSIBILITIES AND CORE COMPETENCIES (Purchase and Planning)

- Understanding the customers demand and preparing production plan w.r.t available resource.
- Co-ordinating and sustaining the existing suppliers.
- Evaluation of new suppliers based on criteria such as cost and financial integrity, quality and supply records, supplier's productivity or service capacity, supplier's commitments towards environment and safety factors, communication and response.
- Assisted in the development of Supply chain management opportunities, resulting in excess sales rate.
- Managed production load during low volume sales order condition.
- Transportation management during procurement and shipment.
- Supporting all the departments across the organisation for procurement or service requirement during new project implementation, existing modification, production improvement and non-production activities.
- Supplier, accounts and projects team co-ordination, PO releasing, and Ensuring 100% payment immediately after work completion.

Projects Done-

- ✓ Created centralised database that properly organised numerous incoming materials from multiple suppliers, helping to streamline operations and provide inventory reports with 90% accuracy.
- ✓ Cost reduction done by renegotiated contracts and eliminated of obsolete vendor parts.
- ✓ Transport planning done to collect multiple material at a time and achieved cost reduction with effecting and delay in supply.

➤ Toyota Kirloskar Auto Parts

RESPONSIBILITIES AND CORE COMPETENCIES (Manufacturing Engineering)

- Leading and representing Electrical team for Major projects.
- 100% responsible and accountable w.r.t Electrical area for all ME projects from initial stage to final stage
- Planning, procuring, supplier identification, supplier co-ordination during all the stages of Project execution.
- Approving and executing logic modification and electrical designs for new machine procurement.
- Approving and executing logic modification and electrical designs for In-house modification.
- Supporting and co-ordination ME team for executing modification activities.
- Working on ideas and executing for Engineering change points, requested by all the departments related to cost reduction, safety and quality aspects and productivity improvement by working on zero-line stoppage and reducing cycle.
- Giving approval for new machine procurement and Modifications for existing lines by doing and confirming 100 % safety check, control check, and equipment check related to electrical aspects and ensuring zero incidents & accidents, zero defects.
- Building QAN (quality assurance network) in assembly lines for ensuring 100% quality output and zero rework or repetitive activities.
- Understanding, creating and explaining machine related standards to project team, suppliers and other stakeholders.
- Preparation and evaluation of FMEA during new machine installation and conducting Risk assessment for any kind of machine modifications.

Projects Done-

- ✓ Successfully completed new line setup for diesel variant
- ✓ Modifications in existing machine for 6th gear addition.
- ✓ Successfully completed CNC upgradation (retrofit) activity for 7 Grinding machines.
- ✓ Traceability system installed for assembly lines.
- ✓ Build QAN for all assembly lines by creating innovative ideas and installing various kind of Poka-yoke.
- ✓ Relayout of Diff-Assy line and new Andon setup.
- ✓ Worked on Hybrid variant project.

Education:

- Master of Business Administration from Gandhi Institute of Technology and Management with CGPA 6.74 in 2019
- Bachelor of Arts from Karnatak University Dharwad with 60.76% in 2015
- Diploma in Mechatronics from Nettur Technical Training Foundation Dharwad with 85.1% in 2012
- S.S.L.C with 87.20% in 2009

Declaration:

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.
